

#### **High-Performance SAN System for Enterprise Entry**

QSAN XS3212 Series is the high performance, simple, secure, scalable and affordable SAN storage systems for enterprise and SMB. It is an ideal solution to the applications of virtualization integration, media and entertainment, or large scale surveillance; and also backup and disaster recovery in SMB or ROBO (Remote Office/Branch Office) deployments.

#### **Product Highlights**

- · High Performance SAN storage system with Dual-Active (Active/Active) controller
- · High availability design with no single point of failure
- 5th generation Intel® 4-core processor, up to 128GB RAM per controller
- · Latest 12Gb SAS 3.0 technology
- Built-in 10GbE iSCSI
- Up to 12,000MB/s sequential read and 8,000MB/s sequential write throughput. up to 1.1 million sequential IOPS
- Scale up solution supports over 8.7PB of raw storage capacity
- QSAN SANOS (SAN Operating System) 4.0
- Advanced Storage Management
  - Thin Provisioning
  - · SSD Cache (read and write cache)
  - Auto Tiering
  - Snapshot
- Flexible I/O host cards for iSCSI SAN or Fibre Channel SAN
- Local clone and remote replication for disaster recovery
- · Virtualization support for VMware VAAI, Microsoft Hyper-V ODX, and Citrix
- · Cache-to-Flash memory protection technology

### **Application Areas**

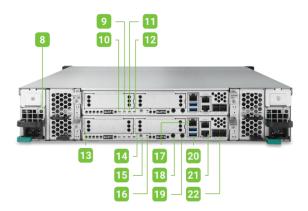

With the next generation storage platform, the XS3200 series is positioned to provide excellent values for customers and can deliver ultra-high performance for both throughput and IOPS to enable all kinds of enterprise applications, such as

- · Consolidation a virtualization : virtualized data center, VMware, Hyper-V, Citrix
- · Backup and disaster recovery: Symantec, Commvault, Veeam, Acronis
- Media and entertainment: 2K/4K/8K video editing, streaming, archiving
- Large-scale surveillance: mega structure (shopping mall/skyscraper), public transportation (airport/train station/highway), secure and smart city infrastructure
